

Designing of a Hybrid Fijian Outrigger Sailing Canoe to optimize its performance and safety

Fiji National University

School of Mechanical Engineering

Presenter: Joji Marau Misaele 17:10:2012

Preparation and construction of the main hull of my Fijian Sailing Canoe (“Camakau”)

Hand Tools Used

Preparing the Hull for Assembly

Pre-Assembly of main hull

Assembly of Main Hull and flooring

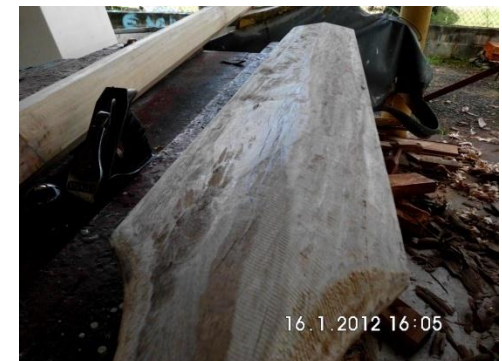

Assembly of main hull and Outrigger

Preparing the Sail

Preparing the Mask and Radar

Final Preparation before launching

Launching

Testing

Maintenance and preparing for the canoe race

Veitau waqa (Canoe Race)- 1st Place

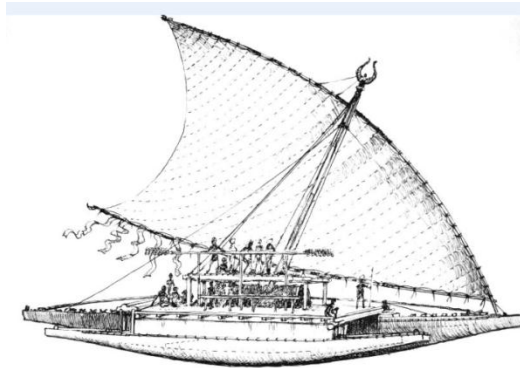

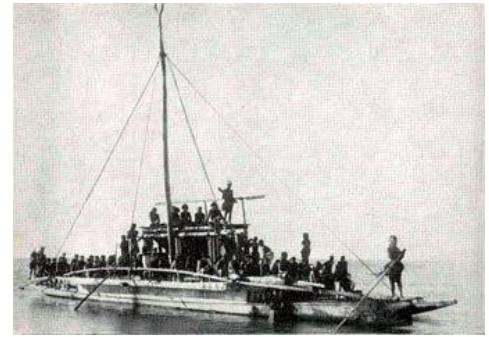

- My Sailing canoe was the fastest in the annual race therefore one of my objective was achieved which is “built for speed”

Further Project-Drua Tavonovono

Thank You and Vinaka Vakalevu
